June 12, 2024

Future Honors Algebra 2 Student,

Welcome to Honors Algebra 2! I am so excited to have you in class in the fall! Your teacher will either be Mrs. Munsey, Mrs. Mueller, or Mr. Zielski. We are truly the luckiest teachers at North Central because we get to navigate this challenging course with rockstar students like yourself.

Here are a few things I need you to know about Honors Algebra 2: **YOU CAN DO THIS!** Your teachers will work extremely hard to make sure you are as prepared as possible for continuing to AP Pre-Calculus if that is your intended next math course. To do this I need you to do some skill building/practice over the summer so come September 2024 we can hit the ground running.

What you will need: Computer (or cell phone) with internet access to access Delta Math.

*** If you don't have access to a computer or reliable internet PLEASE reach out to me ASAP!

[Click HERE](#) for a video showing you a brief overview of how Delta Math works for our summer practice.

(This letter was emailed to your school email address to access the links)

Delta Math Log Information: Watch this video ([click here](#)) to see how to get signed up for your Summer Honors Algebra 2 or follow the directions below!

- **Use the following link:** <https://www.deltamath.com/students?code=5Z63-837U>
- **Sign in if you already have a Delta Math Account or Create an account. Be sure your full first and last name is displayed when you sign up.**

This summer assignment will be part of your grade in the fall. All assignments need to be completed by the first day of class for 2024-2025.

Why is doing this work over the summer important? The goal of this summer assignment is to let us cover the basics of the first Topic of Algebra 2 during the summer so we can get into Topic 2 more quickly which will allow us time to go more in-depth with Algebra 2 concepts that you will also see in Pre-Calculus throughout the year.

The goal is to continue to practice and fine tune some basic Algebra 1 skills over the summer to keep everyone fresh and ready to tackle the challenging year that is ahead of us.

This practice SHOULD NOT take up your whole summer! Completing all practice assignments is HIGHLY RECOMMENDED. This practice is intended to help prepare you for the fall and set you up for an awesome year of Calculus. There are 11 weeks of summer break. This practice should not take more than 5 hours over the course of the entire summer. **If you get stuck let me know by email or join Remind with the code @7ca68f2 and we will help you out! We want you to know that We are here for you ALWAYS!**

Putting in work this summer will set you up for success the rest of the year!

Have a wonderful summer break! I look forward to working with you in the fall! **If you or your parents/guardians have any questions or concerns please email me, or join our Remind with the code @7ca68f2.** Your message will go to all 3 teachers.

Have a wonderful summer! We am so excited to work with you in September.

Sincerely,

Mrs. Munsey
